Professional Summary

Data Analyst with 15 months of corporate experience at Accenture in data operations, data quality, and Trust & Safety. Skilled in SQL, Python, Power BI, Tableau, and Advanced Excel, with hands-on experience in data validation, anomaly detection, predictive modeling, dashboard development, and data automation. Seeking an entry-level Data Analyst or Business Analyst role to apply analytical and problem-solving skills to business data.

Technical Skills

SQL: MySQL, SQL Server, Joins, CTEs, Window Functions, Stored Procedures

BI & Reporting: Power BI, DAX, Power Query, Tableau, Excel, Pivot Tables, VLOOKUP, Charts

Python: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook

Analytics: EDA, Data Cleaning, Data Validation, Anomaly Detection, KPI Development, Cohort Analysis, Hypothesis Testing, ETL

Tools: GitHub, VS Code, Power BI Service

Professional Experience

Accenture

Mumbai, India

Data Operations Analyst – Trust & Safety, Data Quality & Operations

June 2024 – September 2025

- Reviewed and validated 500+ structured data records daily, sustaining accuracy above 98% under strict SLA deadlines and recording zero critical SLA breaches across 15 months.
- Designed rule-based data review frameworks to identify fraudulent patterns and policy violations, contributing to an approximately 20% reduction in escalation rates through systematic anomaly detection and quality benchmarking.
- Identified 15+ recurring data-quality gaps, performed root-cause analysis, and proposed standardized review SOPs that reduced manual rework across the team.

Projects

Excel Data Cleaning & Quality Automation

Excel / VBA / Macros

- Built a reusable VBA-based data cleaning automation to process different Excel datasets with a single click.
- Automated missing-value detection, duplicate identification, data validation, formatting, and data-quality flagging.

Website Traffic Analysis & Performance Dashboard

SQL / Python / Tableau / Excel

- Analyzed 50,000+ website sessions across six months using SQL and Pandas, identifying behavioral trends across 8+ acquisition channels, device categories, and geographic regions.
- Built a Tableau KPI dashboard tracking 10+ metrics, including bounce rate, session duration, conversion rate, and channel attribution, with interactive filters.
- Centralized recurring marketing reports into a self-serve dashboard, eliminating 3–4 hours of manual reporting effort per week and an estimated 150+ analyst-hours annually.
- Used cohort analysis and funnel visualization to identify high-drop-off user segments and surface UX recommendations for product prioritization.

Telecom Customer Churn Prediction

Python / SQL / Scikit-learn / Power BI

- Analyzed 7,000+ customer records through data ingestion, cleaning, feature engineering, model training, and evaluation; achieved 85% classification accuracy using a tuned Random Forest model.
- Identified the top churn drivers, including contract type, customer tenure, and monthly charges, and translated findings into targeted retention recommendations.
- Built an interactive Power BI dashboard with dynamic KPIs, segment filters, and drill-through views for self-serve churn monitoring.
- Addressed class imbalance using SMOTE, label encoding, and missing-value imputation, improving minority-class recall by approximately 12%.

Education

Bachelor of Commerce – Banking & Insurance (BBI)

2021 – 2024

Satish Pradhan Dnyanasadhana College, University of Mumbai

Thane, Maharashtra / GPA: 8.00/10.00

Certifications

Google Analytics Certification – Google Skillshop

May 2026

Data Analysis with Python (DA0101EN) – IBM Developer Skills Network

May 2026

Python 101 for Data Science (PY0101EN) – IBM Developer Skills Network
